Arc Flash Safety - NFPA 70E

(English) (20 Minutes)

Under OSHA requirements, the NFPA 70E places additional requirements on all organizations to properly identify hazards and provide training for anyone who may work on, near or around electrical equipment.

Some of the specific requirements discussed in this arc flash video include:

- Introduction to understanding & reducing Arc Flash hazards
- Arc Flash protection
- Personal protective equipment requirements for Arc Flash
- Required signs and labeling
- Training requirements
- Documentation requirements
- Work Permits
- More

This arc flash video will provide information to train employees in Arc Flash Safety, meet OSHA requirements of the new NFPA 70E and help reduce the hazards associated with electrical arc flash and blasts.

Written Materials CD Includes:

- Instructors Manual
- Exam and Answer Key
